Jiri Svoboda

I divide my time between building my own projects, teaching IT, and writing my tech blog, and I am looking for a remote, part-time role where I can apply my skills.

I build web sites and clean web applications using Python, Flask, Streamlit and HTML/CSS/Pico, and I naturally use AI tools to speed up my workflow.

Having run my own e-commerce business and worked in sales, I understand the practical side of a project, not just the code. I live by a simple rule: a well-designed system beats raw motivation. Currently based in Peru.

Experience

2025 - present

Online IT Academies

Engeto, Coders Lab, Computer Help, ITnetwork & private clients | remotely

Educator & Mentor

Python & Software Development Principles

- Designed and delivered advanced courses in Python, OOP, databases, data visualization (Streamlit) and web/API development (Flask) for university students and adult career-changers.
- Developed a comprehensive curriculum (see [GitHub](#)), conducted code reviews, and offered career guidance.

2024 -2025

High school of Information Technologies and Automotives | Prague, Czechia

Python Programming Teacher

- Taught advanced courses in Python, OOP (Object Oriented Programming) and software architecture principles.
- Covered following topics: variables, data types, lists & dictionaries, loops, conditions, functions, decorators, modules & packages, error handling, work with files, code refactoring, classes, attributes, methods, encapsulation, inheritance, polymorphism, abstraction, SoC principles and virtual environment.

2020 - 2023

Masaryk Classical Gymnasium / Highschool | Ricany, Czechia

Computer Science & Programming Teacher

- Created and taught a comprehensive IT curriculum for students aged 13-19, focusing on project-based learning environment with hands-on use of modern tools and technologies.
- Introduced students to digital literacy fundamentals and built toward applied technical skills: Foundations (MS Office), Digital Content Creation (videos, web & e-shop design with HTML/CSS and templates, AI tools (Image editors, LLMs - ChatGPT, Bard/Gemini). Data processing & visualizations, SQL & databases, Python programming & automation, Robotics & Physical Computing.

2017 - 2025

Pagania - Independent E-commerce Project | Prague, Czechia

Founder & Content Creator

- Developed and managed E-shop, created web content, manufactured products, managed digital marketing, and designed educational workshops and public presentations on historical topics for general audience.
- Built online business with handmade products, created content for social networks and websites.

2017 - 2020

LFM - servis s.r.o. | Prague, Czechia

Sales Representative: Solutions Specialist

- Managed full sales cycle focusing on understanding client needs and explaining complex products and services.
- Using clear communication to cultivate strong, long-term client relationships and increase customer retention.
- Consistently met national sales targets for portfolio of heavy industrial machinery (presses, crushers).

2007 - 2015

ALFA SYSTEM s.r.o. | Dobruška, Czechia

Hydrogeological Analyst & Data Specialist

- Analyzed complex environmental datasets for risk assessment projects, created detailed technical reports and data visualizations (maps, charts) to present results to non-technical stakeholders.
- Successfully translated raw scientific data into operational strategies, empowering clients and stakeholders to make sound, data-driven decisions.
